

NORTHWESTERN CONNECTICUT COMMUNITY COLLEGE

COURSE SYLLABUS

Course Title: Photography I Lecture & Studio

Course #: ART 141

Course Description: Three (3) credit hours. Development of skills in the practical application of basic photographic principles including the proper exposure of film, the processing of film, print finishing and the creative aspects of photography.

GOALS/OBJECTIVES: To teach the basic principles of operation of a variety of photographic equipment and darkroom procedures as well as the basic principles relative to exposure, film development and paper processing. To show various creative applications of photography, and to cultivate an appreciation of photography as a means for personal expression.

COURSE OUTCOMES: Students will...

- Employ the principles of operations of a variety of photographic equipment and darkroom procedures.
- Demonstrate knowledge of the basic principles relative to photographic exposure, film development, and paper processing through the creation of a portfolio of prints.
- Incorporate the elements and principles of design in the images they make to communicate ideas.
- Evaluate photographs using a variety of analytical approaches.
- Define and analyze a creative process, defining the concept of creativity and describing the components of a creative process in the field of photography.
- Explain how engaging in a creative process affects one's perception of the world.
